#### PPE for Droplet & Contact Precautions

Consists of: mask, eye protection, gown and gloves

#### Face Protection

- **Use Face Shield with any Mask below**
  - Wear mask continuously.
  - When appropriate, mask may be safely doffed for re-use.
  - Discontinue mask only if soiled, damaged, or hard to breathe through.
  - Face shield may be worn continuously while providing direct patient care to multiple patients.
  - Do not face shield and do not when direct patient care tasks are completed.

**Face Protection**

- **Face Shield**
- **Mask**
- **Gloves**
- **Gown**

**PPE Selection and Practice Guideline**

- **Patient room on routine practices**
- **Patient room on droplet & contact precautions**
- **The PPE is required for ALL patients during the following AGMPs: SEE LIST BELOW**
- **The PPE is required for patients on routine practices during the following AGMPs: SEE LIST ABOVE**
- **PPE to keep on while rounding between patients on droplet & contact precautions**
- **Unimurning station**
- **Off unit (not for patient transport)**

**PPE for Aerosol-Generating Medical Procedures (AGMP)**

Consists of: N95, eye protection, gown and gloves

#### Face Protection

- **Fit-tested, Seal-Checked N95 with Face Shield**
  - Wear N95 continuously until soiled, damaged, or hard to breathe through.
  - Once removed for any reason, this should not be put back on.

**Face Protection**

- **Face Shield**
- **Fit-Tested, Seal-Checked N95**
- **Gloves**
- **Gown**

**Face Protection**

- **Face Shield**
- **Fit-Tested, Seal-Checked N95**
- **Gloves**
- **Gown**

#### How do I safely reuse my mask? (does not apply to N95 and Mask with Integrated Visor)

1. Perform hand hygiene.
2. Remove the mask using the ear loops (the front of the mask may be contaminated, so do not touch it); remove mask slowly and carefully.
3. Once removed for any reason, this should not be put back on.
4. Store mask in a designated safe location (see Mask Storage Tips D).
5. The mask may be put back on again after hands have been cleaned.

**Face Protection**

- **Face Shield**
- **Fit-Tested, Seal-Checked N95**
- **Gloves**
- **Gown**

#### PPE for Aerosol-Generating Medical Procedures (AGMP)

- **This PPE is required for ALL patients during the following AGMPs: SEE LIST BELOW**
  - Oral, pharyngeal, transphenoidal and airway surgeries
  - Nasopharyngoscopy, laryngoscopy
  - Autopsy
  - Nasopharyngoscopy, laryngoscopy
  - Oral, pharyngeal, transphenoidal and airway surgeries (including thoracic surgery and tracheostomy insertion)
  - *suggest avoid where possible

**Mask Storage Tips**

- Store mask with inside facing upward on clean surface.
- Keep mask in a clean, breathable container (e.g., paper bag).
- Use of mechanical cough-assist device.
- Large volume nebulizers for humidity (e.g., each mask with cool humidity set up/)
- Nasopharyngoscopy, laryngoscopy
- Oral, pharyngeal, transphenoidal and airway surgeries (including thoracic surgery and tracheostomy insertion)
- *Suggest avoid where possible

5. The mask may be put back on again after hands have been cleaned.

**Mask Storage Tips**

- Store mask with inside facing upward on clean surface.
- Keep mask in a clean, breathable container (e.g., paper bag).
- Be sure container is labelled.
- Containers should be disposed of or cleaned regularly.
- Container must be reused (including thoracic surgery and tracheostomy insertion)

**PPE for Aerosol-Generating Medical Procedures (AGMP)**

Consists of: N95, eye protection, gown and gloves

#### Face Protection

- **Fit-tested, Seal-Checked N95 with Face Shield**
  - Wear mask with integrated visor continuously until soiled, damaged, or hard to breathe through.
  - When leaving the clinical area, mask with integrated visor must be discarded.
  - Once removed for any reason, this should not be put back on.

**Face Protection**

- **Face Shield**
- **Fit-Tested, Seal-Checked N95**
- **Gloves**
- **Gown**
